

### **Final Remarks**

The claims have been amended to more clearly define the original elements of the application as to patentable subject matter. The amended claims have been shown to contain elements lacking in the cited art, and the cited art teaches away from the structure and function of applicant's claimed device.

No new matter has been added to claims 1 and 20 which only were amended to include elements from subordinate claims and more clearly worded to show the stacked multiple arrangement with contact along all edges with each other, and the conductor.

Should the Examiner have any further questions or concerns the Examiner wishes to address by Examiner's amendment by telephone or otherwise, or should the Examiner have suggestions to more clearly define the subject matter of the claims to more clearly define the patentable subject matter, the Applicant's attorney would be most receptive to such.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Donn K. Harms', is written over a horizontal line.
